

Guide to Gather for DCRW 2024 (virtual meeting space)

1. Join DCRW 2024 in Gather [here](#) for the poster sessions and to expand your network.
 - Click *edit* to create your personalised avatar
 - Enter your name and click *join* to enter the virtual conference space

2. You are now in the main hall – welcome! You can walk your avatar through this virtual space, simply using the arrows on your keyboard. In this main hall you can:
 - socialise with other participants.
 - visit the stands with different representatives from organisations.
 - go to the poster area and join the poster sessions (by following the arrows at the top of the screen and enter the poster area).

Simply walk up to another avatar and if you are close enough a video chat screen will appear (make sure that you have activated your camera and microphone to use this functionality).

- TO THE EXIT
- Anouschka van de Ven
- EC&I = Education, Culture and Identity
E&W = Economy and Work
FN&C = Food, Nutrition and (Health)Care

Methods **Morphological examination:** Scanning electron microscope (SEM) images were made to examine the sclerites unique to “snowflakes”.

Results

Molecular analyses: Phylogenetic analyses was performed for four markers (COI, mtMutS, 28S, ND6) using maximum likelihood and Bayesian inference.

Genetic distances (uncorrected P expressed as percentage) within species and between genera for two mitochondrial markers (COI and mtMutS) for “snowflake” (n=26), *Clavularia inflata* (n=12) and *Knopia octocontacanalalis* (n=1) specimens.

Map of sampling locations in Okinawa Prefecture around Okinawa-jima Island (11 sites) and Iriomote-jima Island (7 sites); collection sites “snowflake” (black ✱) and *Clavularia inflata* (grey ✱) specimens.

In situ photographs of polyp variations seen in “snowflakes” specimens: a) IRI170725-13 b) IRI170725-17 c) IRI170727-59 d) IRI170725-22. Images of “snowflakes” specimen e) stained with methylene blue to visualize pseudopinules of the tentacles and f) colony preserved in ethanol. Scale bar 1 mm.

Conclusions

* Collected “snowflake” spe-

4. Or if a presenter is present there will be an avatar standing by and you can attend the presentation. Walk your avatar close to the poster and presenter and a video chat screen will appear (make sure that you have activated your camera and microphone to use this functionality).
 - Have a look at the DCRW programme to see when your favourite poster will be presented.
5. You can go back to the main hall, by walking your avatar to the exits (on left and right side of the screen). In the main hall you can socialise with other participants and visit the stands with different representatives from organisations.
 - for the stands, have a look at the DCRW programme to see when the representatives are present for a live chat (make sure that you have activated your camera and microphone to use this functionality).
